

CONNECT-EZ® / PA-12/PA-18

PATENTED TILT-UP WALL PANEL ANCHOR

SIMPLE • SAFE • SECURE™

SAVES TIME & LABOR!

Since the introduction of the American Concrete Institute's code requirement (ACI 318-14, 16.2.4.3(b)) to provide a pair of minimum 10,000 pounds tension connections between concrete wall panels and foundations, engineers have struggled to find a connection solution that was simple to design and detail, and economical to fabricate and install in the field. **The struggle is over!** The patented Connect-EZ® Panel Anchors meet the challenge.

SIMPLE INSTALLATION

- Eliminates field welding
- Installs easily in minutes

SAFETY ASSURED

- Exceeds the code-required tensile load of 10,000 lbs by a factor of 2.4!
- Installs immediately behind the panel erection as the crane is repositioned
- Complies with ACI 318 -14- 16.2 & 17 and is fully load tested

SECURE CONNECTION

- Eliminates the necessity of a "pour-back" strip
- Installs inside the building on a hard, dry surface
- PA covers and drill cavity "breakaway" model available when required for building aesthetics
